SUMMARY

AI engineer with 6.5 years building and operating production Python services, the last 3 focused on LLM applications and multi-agent workflows serving internal business users.

SKILLS

Languages: Python, SQL, TypeScript, Bash

AI / LLM: LangChain, LangGraph, RAG, function calling, prompt evaluation, LangSmith

Data / Retrieval: Qdrant, pgvector, FAISS, text-embedding-3-large

Backend: FastAPI, Celery, PostgreSQL, Redis

Cloud / Ops: AWS (ECS, Lambda, S3), Docker, GitHub Actions, Terraform basics

PROFESSIONAL EXPERIENCE

Senior AI Engineer - Zenlytix Technologies (Mar 2023 - Present)

- Designed a LangGraph multi-agent workflow for customer-support triage: a router node, three specialist nodes and a human-review checkpoint, handling ~180k requests/month in production.
- Implemented tool calling across 6 internal REST APIs with typed Pydantic schemas and strict structured outputs; reduced malformed-call rate from 9% to 0.4%.
- Built the RAG layer over 240k support documents using Qdrant and text-embedding-3-large; raised retrieval recall@5 from 0.61 to 0.88 by moving to section-aware chunking and adding a rerank stage.
- Deployed everything behind FastAPI on AWS ECS Fargate with GitHub Actions CI/CD; added LangSmith tracing and per-run cost attribution.
- Owned an offline evaluation suite (180 labelled queries) run on every PR.

Backend Engineer - Finlytics Systems (Jul 2019 - Feb 2023)

- Built Python/FastAPI microservices for a payments reconciliation platform processing 4M records/day.
- Containerised 14 services with Docker and moved deployments to ECS; cut release time from 45 minutes to under 8.
- Introduced pytest-based contract tests and raised coverage from 22% to 76%.

PROJECTS

enterprise-agentic-rag (open source) - Reference LangGraph + FastAPI + Qdrant agent with Docker Compose deployment and an evaluation harness. 340 GitHub stars.

EDUCATION

B.Tech, Computer Science - NIT Warangal, 2019

CERTIFICATIONS

AWS Certified Solutions Architect - Associate (2022)
