SUMMARY

ML engineer with 8 years shipping supervised learning systems in retail and logistics. Deep experience in feature pipelines, model training at scale and MLOps.

SKILLS

Languages: Python, SQL, Scala

ML: scikit-learn, XGBoost, PyTorch, TensorFlow, time-series forecasting

MLOps: MLflow, Airflow, Kubeflow, SageMaker, Kubernetes

Cloud: AWS (SageMaker, EMR, S3), Docker, Jenkins

Data: Spark, Databricks, Snowflake, Feast

PROFESSIONAL EXPERIENCE

Lead ML Engineer - Cartwheel Retail Group (Jan 2021 - Present)

- Own demand-forecasting models for 12,000 SKUs; reduced forecast MAPE from 18.4% to 11.9% using gradient-boosted trees with hierarchical reconciliation.
- Built the training platform on SageMaker with MLflow tracking and Kubernetes-based batch inference serving 40M predictions/week.
- Ran a pilot using the OpenAI API to summarise merchandiser notes into structured fields; shipped as a small internal tool.
- Mentored 5 engineers; introduced model cards and drift monitoring.

Data Scientist - Trellis Logistics (Aug 2017 - Dec 2020)

- Built route-ETA models in PyTorch; deployed via Flask services on EC2.
- Designed Spark feature pipelines over 2TB/day of telemetry.

EDUCATION

M.Tech, Data Science - IIT Madras, 2017

B.E., Electronics - Anna University, 2015

CERTIFICATIONS

Databricks Certified ML Professional (2023)
